Cumhuriyet Mah. Çalikağa Sok. No:9 Kat:3 D:6
Silivri/İstanbul · Türkiye

Triulzi glass washing and drying systems are high-efficiency industrial lines that ensure the flawless cleaning of flat and coated (low-e) glass prior to lamination, coating and insulating glass production. The washing body is made entirely of stainless steel; the glass surface is precisely cleaned with water sprayed homogeneously through cylindrical brushes and nozzles. Drying is performed with high-pressure fan-fed stainless steel air knives, achieving complete dryness without leaving marks on the surface.

With models such as SY Low-Emission, Jumbo Size, Compact High Tech, Toscana and Mini, it offers a wide range of solutions from small glass of 45×45 mm up to jumbo sizes; an ultrasonic washing variant is also available. The operating speed is electronically controlled, monitored on a digital display, and performance of up to 60 m/min can be achieved. It can operate as a standalone unit or be integrated with insulating glass lines, vertical drilling, edging and straight-edge processing machines.

It is suitable for the requirements of sectors such as shower cabins, joinery, solar panels, automotive, white goods, pharmaceuticals and optics. Concept Solutions is by your side with its expert team for the selection, installation and technical support of Triulzi (Italy) solutions.
